Translation method for e.g. electronic mail in internet, involves judging field of input source language, based on which translation for destination language is selected from dictionary

TOSHIBA KK 2000.03.27 2000JP-086799

(2001.10.05) G06F 17/28

Novelty: The field of input source language is judged based on which a translation for destination language is selected from a dictionary. A translation sentence in destination language is generated using the selected translation. Answer input corresponding to translation sentence is translated into source language using field information and dictionary.

Detailed Description: INDEPENDENT CLAIMS are also included for the following:

- (a) Translation system;
- (b) Translation server;
- (c) Information transmission medium;
- (d) Recording medium that stores translation program

Use: For translating sentences in electronic mail, chat in internet.

Advantage: Since the field of input source language is judged, the translation for destination language is selected automatically. A word is unified and disparity of misunderstanding the content is reduced.

Description of Drawing(s): The figure shows an explanatory diagram of translation system. (Drawing includes non-English language text).
